THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

Response to Amendment

1. This office action is in response to an amendment filed on 12/28/2010.
2. Claims 4, 22, 24, 40 and 41 have been amended by the applicant.
3. Claims 1-3, 5-14 and 25-39 have been previously presented.
4. Claims 15-21, 23 and 42 have been cancelled.
5. Claims 43-45 have been added.

Allowable Subject Matter

Claims 1-14, 22, 24-41 and 43-45 are allowed. The following is an examiner's statement of reasons for allowance: In regards to claim 1, the prior art fails to teach projecting a first image that appears on the cut surface onto a first plane perpendicular to the time axis, varying the cut surface in time, projecting a second image that appears on the varied cut surface onto a second plane perpendicular to the time axis, and outputting the first and second images appearing on the first and second planes as new moving pictures, therefore claims 1-3 are allowable.

In regards to claim 4, the prior art fails to teach an image data output unit which outputs, as new moving pictures, the images appearing on the plane obtained by varying the cut surface in time in said image conversion unit such that: said image data output unit outputs, as the new moving pictures, a first image obtained by projecting the image that appears on the cut surface onto a first plane perpendicular to the time axis and a second image obtained by projecting the image that appears on the varied cut surface onto a second plane perpendicular to the time axis, therefore claims 4-14, 27, 29, 31, 33, 35 and 43 are allowable.

In regards to claim 22, the prior art fails to teach said image conversion unit creates the image that appears on the cut surface by reading out, from the plurality of frames, data that correspond to the in-picture position and synthesizing the data at an alpha value according to an attribute value thereof, for each in-picture position, and wherein said image data output unit outputs, as new moving pictures, the images that appear on the perpendicular surface by varying the cut surface in time, such that: said image data output unit outputs, as the new moving pictures, first image obtained by projecting the synthesized image appearing on the cut surface onto a first plane perpendicular to the time axis and a second image obtained by projecting the synthesized image appearing on the varied cut surface onto a second plane perpendicular to the time axis, therefore claims 22, 28, 30, 32, 34, 36, 37-39 and 44 are allowable.

In regards to claim 24, the prior art fails to teach said image conversion unit creates the image that appears on the cut surface by reading out, for each in-picture position of an image contained in a target frame, data that correspond to the in-picture position from a frame temporally displaced from the target frame by an amount determined by an attribute value of the in-picture position, and then synthesizing the data at an alpha value according to the attribute value, and wherein said image data output unit outputs, as new moving pictures, the images that appear on the perpendicular surface by varying the cut surface in time, such that: said image data output unit outputs, as the new moving pictures, first image obtained by projecting the synthesized image appearing on the cut surface onto a first plane perpendicular to the time axis and a second image obtained by projecting the synthesized image appearing on the varied cut surface onto a second plane perpendicular to the time axis, therefore claims 24-26 and 45 are allowable.

In regards to claim 40, the prior art fails to teach regarding original moving pictures as two-dimensional images that vary along time axis, and when the moving pictures are expressed, in a virtual manner, as a box space formed by the two-dimensional images and the time axis, cutting the box space by a surface that contains a plurality of points each of which differs from the other in time value; projecting a first image that appears on the cut surface onto a first plane perpendicular to the time axis; varying the cut surface in time; projecting a second image that appears on the varied cut surface onto a second plane perpendicular to the time axis; and outputting the first and second images appearing on the first and second planes as new moving pictures, therefore claim 40 is allowable.

In regards to claim 41, the prior art fails to teach recording, in sequence, original moving pictures in a memory for each frame; determining, for a first in-picture position of a first image contained in a first target frame, a first plurality of frames at predetermined time intervals from the frames recorded in said memory, and reading out, from the first plurality of frames, first data that correspond to the in-picture position; synthesizing the first data with the first target frame to be output at an alpha value according to an attribute value thereof, for each in-picture position; determining, for a second in-picture position of a second image contained in a second target frame, a second plurality of frames at predetermined time intervals from the frames recorded in said memory, and reading out, from the second plurality of frames, second data that correspond to the in-picture position; and synthesizing the second data with the second target frame to be output at an alpha value according to an attribute value thereof, for each in-picture position; wherein said determining, said reading-out and said synthesizing regard original moving pictures stored in said memory as two-dimensional images that vary along a time axis, and, when the

moving pictures are expressed, in a virtual manner, as a box space formed by the two-dimensional images and the time axis, cutting the box space by a surface that contains a plurality of points each of which differs from the other in time value, and projecting an image that appears on the cut surface onto a plane perpendicular to the time axis, the program further configured to perform steps comprising: forming new moving pictures by sequentially outputting at least the first and second synthesized frames along a time axis, wherein said forming outputs, as new moving pictures, the images that appear on the perpendicular surface by varying the cut surface in time, therefore claim 41 is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
